Issue: tailwindlabs/tailwindcss-12318

Web Url: https://play.tailwindcss.com/BuKHeMD2uv

Arbituray Value using Clamp() doesn't work if

Closed rexsoi opened this issue on Oct 30, 2023 · 4 comments · Fixed by #12324

rexsoi commented on Oct 30, 2023

What version of Tailwind CSS are you using?
v3.3.3

What build tool (or framework if it abstracts the build tool) are you using?
postcss 8.4.31, postcss-cli 10.1.0, webpack 5.89.0

What version of Node.js are you using?
v16.14.0

What browser are you using?
Chrome 118.0.5993.118

What operating system are you using?
Windows 10

Reproduction URL
Can't provide URL of the project. But it can be replicated on TailwindPlay
https://play.tailwindcss.com/BuKHeMD2uv
on Line 18 mt-[clamp(0.25rem,-0.6731rem+4.1026vw,4.25rem)]

1  <!--
2    Welcome to Tailwind Play, the official Tailwind CSS playground!
3
4    Everything here works just like it does when you're running Tailwind
     locally
5    with a real build pipeline. You can customize your config file, use
     features
6    like `@apply`, or even add third-party plugins.
7
8    Feel free to play with this example if you're just learning, or trash it
     and
9    start from scratch if you know enough to be dangerous. Have fun!
